Data Visualization on Tablets

- Solutions like Exxova allow for consumption of Xcelsius dashboards via streaming, remote desktop-like solution
- Mobile alternatives to Xcelsius dashboards include:
 - RoamBI (Mellmo)
 - Native solution for iOS
 - SAP BusinessObjects Explorer

Adobe AIR Packaging

- Adobe AIR technology (introduced mid-2011) allows Flash/FLEX developers to package applications for mobile platforms (iOS, Android)
- Deliver dashboards to iPad as native apps
- Dashboards for Android are produced in AIR format and consumed natively by Android

InfoBurst Dashboard Delivery

- InfoBurst leverages AIR technology to extend bursting and delivery of dashboards to mobile devices
- Deliver dashboards as native apps for iOS and AIR app for Android
- Manage dashboard data via InfoBurst cache from WebI, database or Excel

InfoBurst Dashboard Delivery

- Deliver InfoBurst-connected dashboards for improved dashboard performance on mobile hardware
- Burst dashboards for personalized, offline dashboards
- Deliver dashboard apps independent of iTunes Store and Android Marketplace
