What's new in Xcelsius SP3?

Presenter: Abhi Singh

Agenda

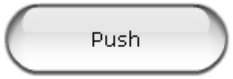
- New Components
- Enhancements
- Performance and Stability

New Components

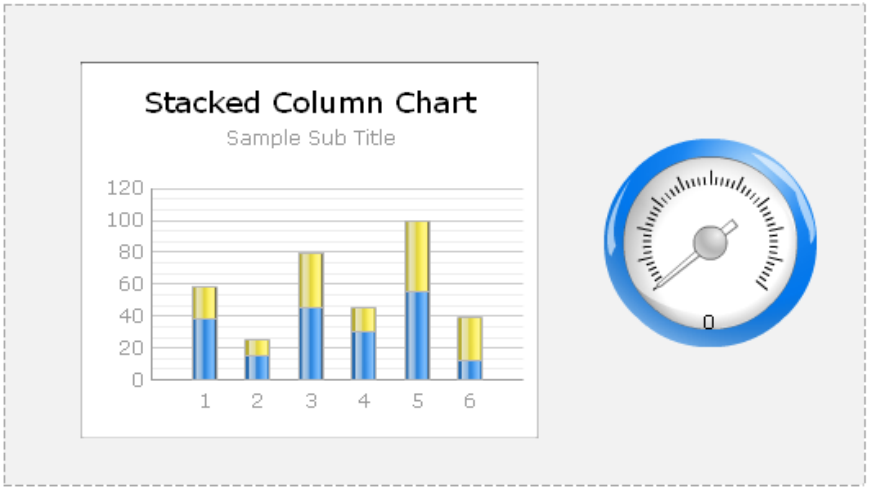
- **Scorecard**
  - Enhanced grid with icon alerting and sorting

Business Unit	Actual Rev.	Target Rev.
Consulting	150000	250000
Product Development	130500	90000
Sales	300000	320000

- **Push Button**
  - Used to drop a range of data

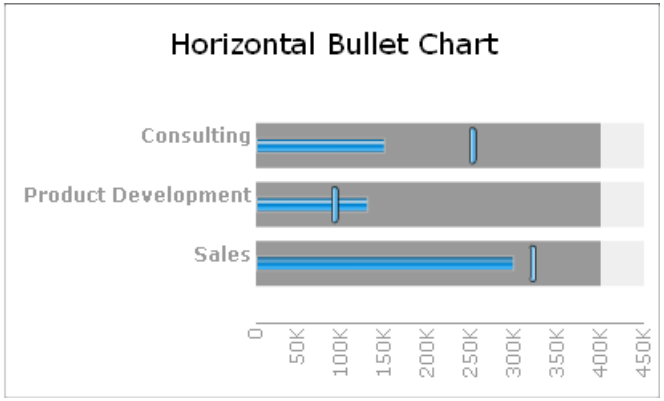


- **Canvas Container**
  - Canvas with no background
  - Alternative to grouping.

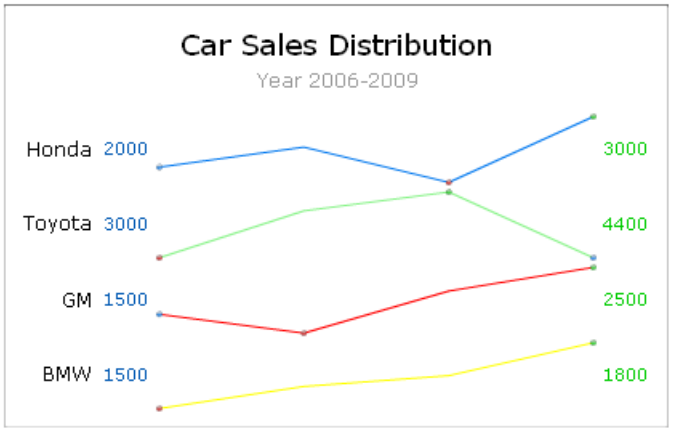


New Components

- **Bullet Charts**
  - Alternative to gauge
  - Require less real estate



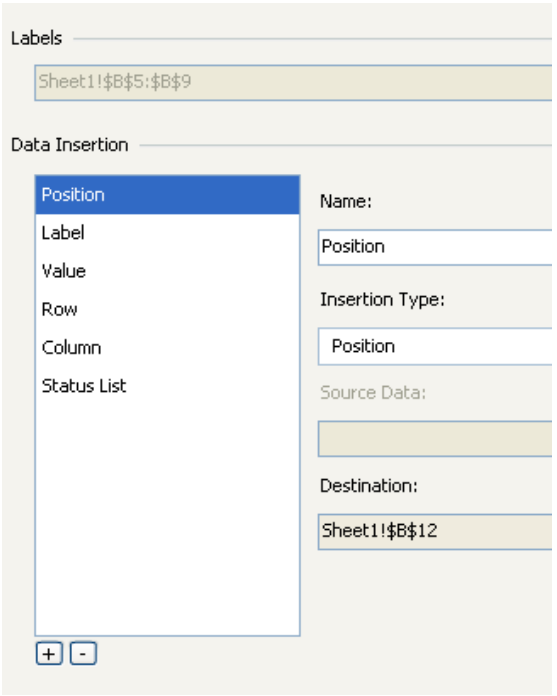
- **Sparkline Chart**
  - Used to do trend analysis.



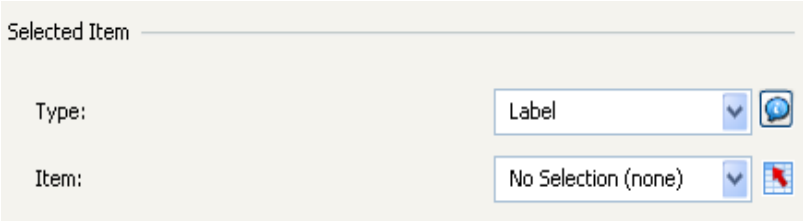
Enhancements

Selector Enhancements

- **Simultaneous multiple insertions**
  - Can be used for a variety of insertion types
  - All fire at the same time and on the same event
  - **Cannot** use multiple insertion with Filtered rows.



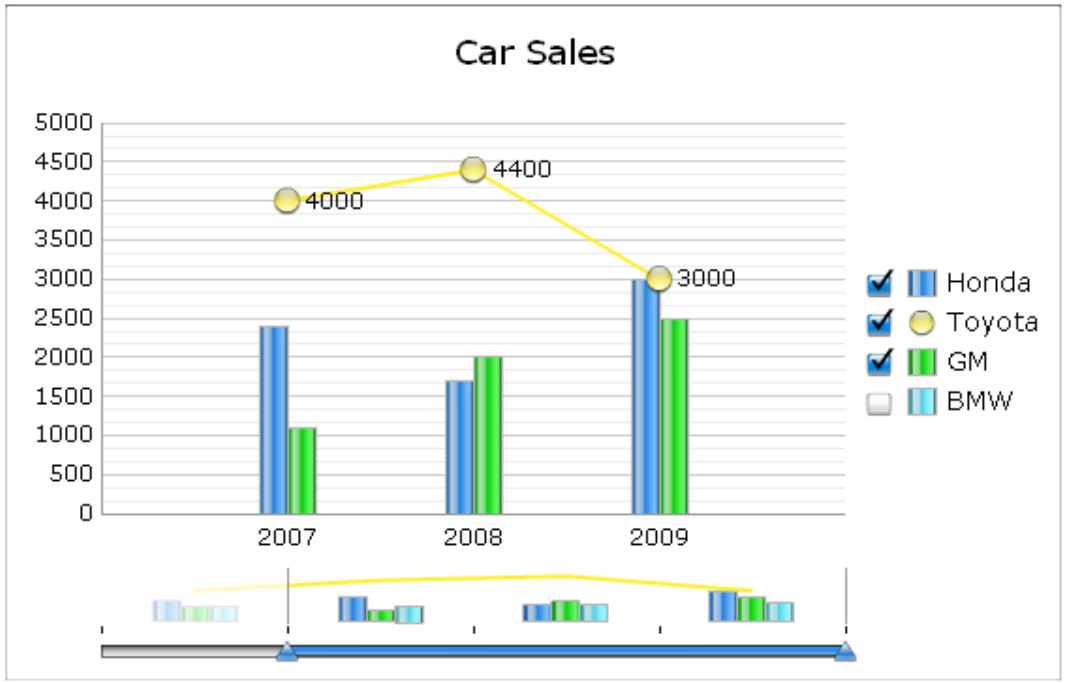
- **No selection option**



Enhancements

Charting Enhancements

- **Labels on charts**
- **Data Sorting**
  - Sorting at design time
  - Very helpful if you don't have pre-sorted data
- **More dynamic charts**
  - Chart range slider
  - Dynamic Series Selection



Enhancements

Single Value Enhancements

- **Multiple indicators on gauge**
  - More than one indicator on the gauge
  - Needle, outside marker, inside marker

- **Disable Input**
  - It allows a single value component visualization to act as a non-changeable display component.

Enhancements

Other Enhancements

- **Dynamic color binding**
  - Can use hex, RGB, VGA and decimal color coding schemes.

- **Automatically resize value and spinner component**

- **Default scenario option**
  - Allow users to create and load a local default scenario
  - Valid only for the scenarios on the computer where they are defined

Performance and Stability

- Open/Save, Import/Export - fewer crashes and data binding loss.
- SWF generation - able to generate larger SWF model with better memory management.
- Excel "Lock" issue – resolved.
- SP3 is faster in SWF gen time and in SWF init time.
