Business Intelligence

SAP BusinessObjects business intelligence (BI) solutions simplify data manipulation, allowing users to access, navigate, analyze, format, and share information across a corporate environment. The following products allow a wide range of processes, from search and navigation to advanced analytics, enterprise query, reporting and analysis, dashboards and visualization, and information infrastructure management.

Note: If your product is not listed in the links below, go to the All Products page for a comprehensive view of all of our product guides in all supported languages.
