MONITORING

- For Real-Time monitoring of the Platform
- Servers expose Metrics
- Watchlists evaluate States based on Metrics
  - OK, Caution, Danger
- Alerts are raised based on Watchlist States
  - Email
  - Display on Launchpad and CMC
- Probes simulate system activity and expose Metrics reflecting the outcome

©2014 InfoSol

AUDITING

- Centralized page in the CMC
  - Database connection (formerly in CCM)
  - Event Selection
  - Additional Details
  - Health Status
  - Purge (default 97 ½ years)

VERSION MANAGEMENT

- Previously LCM, installed separately
- Only one needed per deployment
- Uses SubVersion, installed with the system
  - Also existing SubVersion or ClearCase

©2014 InfoSol

MULTITENANCY

- Described in own manual
- Template for a tenant
  - Folders
  - Groups
  - Categories
  - Connections
  - Etc.
- A complete set created for each tenant

©2014 InfoSol

USER ATTRIBUTE MANAGEMENT

- Add fields to user profile
  - Stand-alone
  - Sourced from 3rd party provider e.g. LDAP
