seeing beyond™

AGENDA

- What is a context?
- Context Uses
- Using the IDT to detect context
- Creating your own context

©2014 InfoSol

CONTEXT DEFINED

- https://maps.google.com/
- Context is a set of joins
- Context path needs to be defined
- Not to be confused with a WEBI calculation context

=max([Sales revenue] In([State] ; [Year]))

©2014 InfoSol
